DETAILED ACTION

1. The enclosed detailed action is in response to the Application submitted on April 16, 2004.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 8 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
4. Claim 8 recites the limitation "the second descriptor buffer" in Line 3. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

6. Claims 1, 7, 25-28, 30 and 32 are rejected under 35 U.S.C. 102(e) as being anticipated by Wang et al. (USPN: 6,970,921).

Art Unit: 2187

Wang discloses a first data buffer (Figure 2, Reference 121); a first descriptor buffer configured with a state of completion of processing (Figure 10, Reference 550); and a free data buffer list configured to identify only the first data buffer in a free condition, wherein the free condition of the first data buffer is independent of the state of completion of processing of the first descriptor buffer (C 12, L 45-65; C 13, L 1-10).

Allowable Subject Matter

7. Claims 10-24 and 36-38 are allowed.
8. Claims 2-6, 9, 29, 31 and 33-35 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
